### Personal protective equipment

Eye protection : depending on the risk, wear sufficient eye protection (safety glasses with side protection or goggles, and if necessary, face shield.)

Hand protection :Long-term exposure Impervious butyl rubber gloves.

Minimum thickness (glove): not determined

With solid dry substances permeation is not to be expected, therefore the breakthrough time for this protective glove has not been measured.

For short-term exposure (splash protection): Nitrile rubber gloves. Minimum thickness (glove): not determined With solid dry substances permeation is not to be expected, therefore the breakthrough-time for this protective glove has not been measured.

These types of protective gloves are offered by various manufacturers. Please note the manufacturers' detailed statements, especially about the minimum thickness and the minimum breakthrough time. Consider also the particular

Respiratory protection : Use respiratory protection in case of insufficient exhaust ventilation or prolonged exposure  
Full mask to standard DIN EN 136

Respirator with a particle filter (EN 143)

The use of filter apparatus presupposes that the environment atmosphere contains at least 17% oxygen by volume, and does not exceed the maximum gas concentration, usually 0.5% by volume. Relevant guidelines to be considered include EN 136/141/143/371/372 as well as other national regulations.
